RAVINDRAN CANARYPALLY

Senior Data Analyst
Bengaluru, Karnataka | canary.mail.7731@example.com | +91 98765 43210
Aadhaar: 2345 6789 0123 | PAN: ABCDE1234F

SUMMARY

Data analyst with ten years of experience turning messy business data into decisions. I build dashboards, write SQL and Python, and explain the numbers to people who do not like numbers. I am the go-to person for reporting questions on my team.

EXPERIENCE

Senior Data Analyst
Canaryworks Pvt Ltd, Bengaluru
Mar 2021 - Present

- Own the weekly sales and churn dashboards in Tableau and Microsoft Power BI, read by 60 managers.
- Wrote Python (pandas, NumPy) jobs that replaced 14 hand-made Excel reports. Runs on a schedule and mails a summary.
- Designed star-schema tables in PostgreSQL; cut the slowest report from 40 minutes to 3 minutes.
- Mentored two junior analysts; ran a monthly SQL clinic.
- Worked with the R&D team on a pricing test and reported the results to the leadership team.
- Wrote the data dictionary for 120 tables and kept it current in Confluence, so new joiners could find things without asking.
- Set up data quality checks that run every night and post failures to a Slack channel before the managers log in.
- Presented the quarterly business review to the leadership team and answered questions on the method behind every number.
- Reviewed the work of the finance analysts and agreed one definition of revenue across the sales and finance teams.
- Tools: Git, Jira, Confluence, Slack.

Data Analyst
Brightloom Analytics, Pune
Jun 2017 - Feb 2021

- Built the first customer segmentation using SQL and Python; adopted by marketing in 2018.
- Created Tableau dashboards for the retail clients and trained their staff to use them.
- Cleaned and joined data from MySQL and Microsoft Excel files, about 2 million rows a month.
- Reported to Dr. R. Menon, head of analytics.
- Moved reports from Word and PowerPoint packs to self-service dashboards.
- Ran a weekly review with the client leads to decide which reports to keep, change or retire; the list of reports fell by a third.
- Documented every dashboard with its source tables, filters and owner, so that a change request took a day, not a week.
- Handled a data migration for the largest client with no downtime and a full reconciliation of totals before and after.
- Taught a two-day course on reading charts honestly to the account managers.

Junior Analyst
Kestrel Logistics, Mumbai
Jul 2015 - May 2017

- Tracked delivery delays in Excel and wrote macros (VBA) to flag late routes.
- Prepared the monthly MIS pack for the operations head.
- Learned SQL on the job and moved the team off shared spreadsheets.

- Built a simple tracker for vehicle breakdowns that showed which routes lost the most hours each month.
- Worked with the warehouse leads to count stock every Saturday and fix the differences before Monday.
- Wrote short notes on how each report was made, so that anyone could repeat the steps.

PROJECTS

Churn early-warning model, 2022

- Built a simple model from billing and support data that flags customers likely to leave within 60 days. Sales used the list every Monday and saved about one in five of them.

Self-service pricing dashboard, 2020

- Put price changes, discounts and win rates on one page for the retail clients, with a one-page guide for first-time users.

Delivery delay tracker, 2016

- A shared sheet and a short macro that showed late routes by hour of the day; the operations head used it in the daily call.

ACHIEVEMENTS

Analyst of the year at Brightloom Analytics, 2019. Best new idea award at Canaryworks Pvt Ltd, 2022. Speaker at a regional data meetup, 2023.

EDUCATION

B.Tech, Computer Science, Canary Institute of Technology, Chennai
2011 - 2015

SKILLS

Python, SQL, Tableau, Power BI, Excel, PostgreSQL, MySQL, pandas, NumPy, Git, Jira, Confluence
Statistics, dashboards, stakeholder reporting, mentoring
