Summary

Backend engineer who writes services in Go and does statistics in R. Strong C and C++ background from embedded work. I consistently excel at explaining technical work to non-technical people, and I excel in client-facing roles.

Experience

Backend Engineer
Canaryworks Pvt Ltd, Bengaluru
Mar 2022 - Present

- Built payment microservices in Go with gRPC; reduced p99 latency by 35 percent.
- Wrote a go-to-market dashboard for the sales team and helped them go live in two weeks.
- Analysed experiment results in R (tidyverse, ggplot2) and presented them to C-level stakeholders.
- Provided read access to production logs for the support team and reviewed role-based access rules.
- Pipelines in Python and PostgreSQL.

Embedded Software Engineer
Brightloom Devices, Pune
Jun 2018 - Feb 2022

- Wrote firmware in C and C++ for a battery controller.
- Worked with the R&D team on test benches; supported the QA team in bug triage.
- Used Linux and Git for daily work.

Software Intern
Kestrel Software, Coimbatore
Spring 2018 internship, Jan 2018 - May 2018

- Fixed bugs and tested a mobile app. Learned how to go from a ticket to a release.

Education

B.E. Electronics, Canary Institute of Technology, 2014 - 2018
Exchange semester abroad, Spring 2017

Skills

Go, R, Python, C, C++, PostgreSQL, gRPC, Linux, Git
